### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9, 14, and 15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 and 9-11 of U.S. Patent No. 6,770,471. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims correspond to a method of using an apparatus claimed in the '471 patent, and the method of using the apparatus follows inherently and necessarily from the claimed structure in the '471 patent.

### ***Allowable Subject Matter***

Claims 10-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

Applicant's arguments filed 4/21/05 have been fully considered but they are not persuasive. Applicants aver that because the instant method claims do not recite the "suspended diaphragm" recited in the '471 patent apparatus claims, the instant "claims are **not** directed to a method of using the device of the '471 patent."

The Examiner notes firstly that if the respective claims of two related patent applications differ only in breadth of scope, then the more broadly recited claims are obvious over the narrower claims. An device lacking the cited "diaphragm" but otherwise equivalent to the device claimed in the '471 patent is obvious over the '471 device; likewise, a more broadly claimed method of using the device is obvious over its more

narrowly claimed version. The instant method claim therefore need not recite the "diaphragm" limitation to be an obvious use of the claimed structure of the '471 patent.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
